PETITION TO CORRECT FILING DATE AND DATE-IN DISCREPANCY
UNDER 37 C.F.R. §1.10(c)

Mail Stop Petition
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

cc: Certificate of Correction Branch

Sir:

Certificate
of Correction
APR 27 2007

In accordance with 37 C.F.R. §1.10(c), Patentee hereby requests a correction of an error in the filing date accorded to the above-identified application, discovered after the patent had issued.

The Patent Office erred in according this application a March 13, 2001 filing date, because the application was submitted via the U.S. Postal Service on March 12, 2001, bearing a proper Express Mail label. The error was perpetuated throughout prosecution, and the incorrect March 13, 2001 filing date appeared as item (22) on the first page of the above-identified patent.

It is believed that the Patent Office can correct the error by granting this petition to establish March 12, 2001 as the correct filing date for the above-identified patent application, and issuing the attached certificate of correction.

The facts are as follows:

APR 27 2007

Patent application Serial No. 09/803,819 ("the '819 application") was filed on March 12, 2001, and matured into the above-identified U.S. Patent No. 7,135,862.

Pursuant to 37 C.F.R. §1.10, the '819 application was filed with an Express Mail label and deposited with the United States Postal Service "Express Mail Post Office to Addressee" on March 12, 2001. Patentee encloses herewith the following documents that evidence that the '819 application was properly filed under 37 C.F.R. § 1.10 on March 12, 2001:

(Exhibit A) copy of a United States Postal Service Express Mail label bearing March 12, 2001 as the "Date In" and the Express Mail number EL 501 637 971 US, which is also date-stamped March 12, 2001 by the Grand Central Station Post Office;

(Exhibit B) copy of a return post card for the '819 application which bears the filing particulars of the '819 application, including Express Mail number EL 501 637 971 US, and which indicates March 12, 2001 as the mailing date, but which is erroneously stamped by the United States Patent and Trademark Office with the date March 13, 2001;

(Exhibit C) copy of the Utility Patent Application Transmittal bearing Attorney Docket No. 7420-0081-999, which was filed with the '819 application and bears the same Express Mail Number EL 501 637 971 US, indicating a deposit date of March 12, 2001;

(Exhibit D) copy of the Pennie & Edmonds Docketing Department Log, executed and dated by Phil Mannino on March 12, 2001 for a package that was addressed to the Assistant Commissioner for Patents, bearing Express Mail No. EL 501 637 971 US. Page 2 of the Log shows that the application bearing docket No. 7420-081 was among the contents of the package mailed on March 12, 2001; and

(Exhibit E) copy of the front page of issued U.S. Patent No. 7,135,862 B2, bearing an incorrect filing date of March 13, 2001 at item (22).

The Express Mail Number on Exhibits B and C as described above was placed on the respective document prior to the original mailing by Express Mail. Attached Exhibits A through E are true copies of the original Express Mail mailing label, return postcard receipt, originally mailed correspondence, docketing log, and the front page of the issued patent.

Since the attached documents evidence the correct March 12, 2001 filing date, and satisfy the requirements set forth in 37 C.F.R. §1.10(c), Patentee respectfully requests that this petition be granted, and that the attached certificate of correction be issued.

FEB 27 2001

No fee is believed to be due for this petition, or for the certificate of correction, since the error was made by the Patent and Trademark Office. Should any fees be required, however, please charge such fees to Jones Day Deposit Account No. 50-3013. Accordingly, patentees respectfully request a grant of this petition, and an issuance of the attached certificate of correction.

Date: April 23, 2007

Respectfully submitted,

Ognjan V. Shentov

Method for data acquisition and processing, which uses time-domain averaging to increase the signal to noise ratio (SNR) in single-event measurements. In a preferred embodiment, NMR echo-trains obtained using high-speed NMR logging are provided, the echo trains are time-domain averaged, preferably in real-time, over one or more time intervals to sharpen the spatial resolution of the logging tool and/or to increase the signal to noise ratio (SNR) of the data train.

cc: Certificate of Correction Branch

Sir:

In accordance with 37 C.F.R. §1.10(c), Patentee hereby requests a correction of an error in the filing date accorded to the above-identified application, discovered after the patent had issued.

The Patent Office erred in according this application a March 13, 2001 filing date, because the application was submitted via the U.S. Postal Service on March 12, 2001, bearing a proper Express Mail label. The error was perpetuated throughout prosecution, and the incorrect March 13, 2001 filing date appeared as item (22) on the first page of the above-identified patent.

It is believed that the Patent Office can correct the error by granting this petition to establish March 12, 2001 as the correct filing date for the above-identified patent application, and issuing the attached certificate of correction.

The facts are as follows:

Patent application Serial No. 09/803,819 ("the '819 application") was filed on March 12, 2001, and matured into the above-identified U.S. Patent No. 7,135,862.

Pursuant to 37 C.F.R. §1.10, the '819 application was filed with an Express Mail label and deposited with the United States Postal Service "Express Mail Post Office to Addressee" on March 12, 2001. Patentee encloses herewith the following documents that evidence that the '819 application was properly filed under 37 C.F.R. § 1.10 on March 12, 2001:

(Exhibit A) copy of a United States Postal Service Express Mail label bearing March 12, 2001 as the "Date In" and the Express Mail number EL 501 637 971 US, which is also date-stamped March 12, 2001 by the Grand Central Station Post Office;

(Exhibit B) copy of a return post card for the '819 application which bears the filing particulars of the '819 application, including Express Mail number EL 501 637 971 US, and which indicates March 12, 2001 as the mailing date, but which is erroneously stamped by the United States Patent and Trademark Office with the date March 13, 2001;

(Exhibit C) copy of the Utility Patent Application Transmittal bearing Attorney Docket No. 7420-0081-999, which was filed with the '819 application and bears the same Express Mail Number EL 501 637 971 US, indicating a deposit date of March 12, 2001;

(Exhibit D) copy of the Pennie & Edmonds Docketing Department Log, executed and dated by Phil Mannino on March 12, 2001 for a package that was addressed to the Assistant Commissioner for Patents, bearing Express Mail No. EL 501 637 971 US. Page 2 of the Log shows that the application bearing docket No. 7420-081 was among the contents of the package mailed on March 12, 2001; and

(Exhibit E) copy of the front page of issued U.S. Patent No. 7,135,862 B2, bearing an incorrect filing date of March 13, 2001 at item (22).

The Express Mail Number on Exhibits B and C as described above was placed on the respective document prior to the original mailing by Express Mail. Attached Exhibits A through E are true copies of the original Express Mail mailing label, return postcard receipt, originally mailed correspondence, docketing log, and the front page of the issued patent.

Since the attached documents evidence the correct March 12, 2001 filing date, and satisfy the requirements set forth in 37 C.F.R. §1.10(c), Patentee respectfully requests that this petition be granted, and that the attached certificate of correction be issued.

No fee is believed to be due for this petition, or for the certificate of correction, since the error was made by the Patent and Trademark Office. Should any fees be required, however, please charge such fees to Jones Day Deposit Account No. 50-3013. Accordingly, patentees respectfully request a grant of this petition, and an issuance of the attached certificate of correction.

Date: April 23, 2007

Respectfully submitted,

Method for data acquisition and processing, which uses time-domain averaging to increase the signal to noise ratio (SNR) in single-event measurements. In a preferred embodiment, NMR echo-trains obtained using high-speed NMR logging are provided, the echo trains are time-domain averaged, preferably in real-time, over one or more time intervals to sharpen the spatial resolution of the logging tool and/or to increase the signal to noise ratio (SNR) of the data train.

21 Claims, 8 Drawing Sheets

Time-domain averaged echo-train data.
